These cylinders are specifically engineered to integrate with both solar thermal systems and air to water heat pumps, allowing you to maximise the use of renewable energy sources for your hot water needs.

Solar unvented cylinders are ideal for homeowners looking for a greener central heating solution. With a dedicated solar coil fitted inside, unvented cylinders can be connected directly to solar panels that ...

If you've got a system or regular boiler and a solar-compatible hot water cylinder, you'll get the best results. Solar cylinders have two heating coils, allowing one to be connected to the boiler central ...

Each model features a dedicated high performance solar coil, transferring the maximum amount of heat from the solar circuit to the stored water. The cylinders are compatible with a wide range of solar ...

Explore high-performance, reliable hot water cylinders, designed for efficiency. Find solar unvented cylinders and heat pumps with varying litre capacities.

Vented, Unvented or Thermal Stores - all twin coil and solar ready

The Megaflo Eco Solar PV Ready is an unvented cylinder that heats water for free; accomplished by an innovative design that harnesses surplus solar electricity to generate hot water, saving energy and ...

Discover how solar energy and air source hot water cylinders work together for free hot water and lower bills. Solar-compatible, efficient, and sustainable.
