Windows embedded with ClearPower(TM) technology are the only solar photovoltaic windows on the market today that allow buildings to cost-effectively self-generate greenhouse gas-free electricity. ...

Companies like Ubiquitous Energy in the US plan to manufacture transparent solar glass windows on a large scale starting in 2024. This California-based company envisions skyscrapers ...

Scientists in China have developed a new way of harvesting solar power by applying a translucent coating over a window to direct energy from ambient light to the edge of the glass -- ...

ClearVue PV, a trailblazer in smart solar solutions, has introduced a revolutionary solar glass, promising to transform building surfaces into energy-efficient power generators.

A new, innovative solution gaining popularity is photovoltaic windows. These windows not only allow natural light to enter interiors but also generate electricity, marking a significant step ...

Glass, wood, concrete, and steel are the longtime cornerstones of building, but to keep up with 21st-century needs, NEXT Energy Technologies is transforming one of the architect's basic ...

Next Energy Technologies, a California-based organic photovoltaic (OPV) start-up, has unveiled what it claims is the world's largest fully transparent organic PV window.

Solar glass windows turn each pane into a power plant by seamlessly integrating photovoltaic technology into the glass itself. This allows you to generate electricity directly from ...
