The adoption of solar photovoltaic (PV) technology and infrastructure are increasing rapidly to meet the ever-growing global need for renewable energy sources. An obstacle to solar PV growth ...

FACE has recently investigated the deaths of three solar installers. Hazards that contributed to these deaths include pitched roofs, working too close to the roof's edge, lack of fall protection, proximity of ...

During the installation, he noticed an exposed cable arcing and emitting smoke, said the Workplace Safety and Health (WSH) Council in an alert on Wednesday. The worker came into ...

The table below presents a statistical overview of accidents pertaining to fatal work accidents and wrongful death in the solar industry, drawn from research data.

On 12 June 2023, a group of workers was deployed to install solar panels on the rooftop of a building. During the installation, one of the workers noticed an exposed cable arcing and emitting smoke.

This Guidance Sheet is intended to assist all those involved in arranging for work and working on roofs handling solar collectors and other large items. It provides basic information on issues to be ...

Yet across solar farms and rooftops worldwide, photovoltaic panel failures are creating surprising dangers. In 2023 alone, Japan's Environment Ministry reported 47 weather-related solar accidents, ...

This document provides guidance on solar construction safety. It discusses general jobsite safety, lifting safety, ladder safety, fall protection, and solar plumbing safety.
