In a recent interview, Elon Musk says that solar is the only logical energy source to build out, and it logically dwarfs all other sources.

According to Musk, this rapid expansion places China at the forefront of providing the energy resources required for the next generation of power-hungry AI technologies.

Elon Musk targets 100 GW of annual solar manufacturing for both Tesla and SpaceX within three years to solve the energy bottleneck threatening the AI revolution.

Elon Musk said on X that, "Solar power will be the vast majority of power generation in the future."

Tesla founder Elon Musk has reiterated his support for solar energy, emphasizing its future potential.

In a bold and mathematically grounded statement, Elon Musk recently claimed that "all energy generation will be solar" in the future. The comment, made on the social platform X, is rooted...

Musk's statement, a response to a chart showing solar's dominance in new electricity growth, highlights a critical bottleneck for the AI boom: a lack of power. Tech giants are scrambling to...

Elon Musk has weighed in on what the future holds for how we power every day life. Elon Musk recently declared on X that "solar electricity will become by far the biggest source of power for ...
