Energy from the sun The sun has produced energy for billions of years and is the ultimate source for all of the energy sources and fuels that we use. People have used the sun's rays (solar radiation) for ...

Solar heating & cooling systems are typically installed on residential or commercial properties, while CSP is only used for large utility-scale power plants. PV technology can be harnessed both at utility ...

Homeowners go solar for all sorts of reasons. For starters, you'll likely save anywhere from \$37,000 to \$154,000 on your electric bills over 25 years, minimize your reliance on fossil fuels, ...

When it comes to installing solar, our resources can help you determine the best options.

Solar energy can be harnessed two primary ways: photovoltaics (PVs) are semiconductors that generate electricity directly from sunlight, while solar thermal technologies use sunlight to heat water for ...

Portable solar generators offer a green solution for powering up during electrical outages or off-grid excursions. Find out how today's top models fared in our hands-on tests.

Generac Solar & Battery Solutions provide a more powerful, resilient and smart way to manage your energy needs. With rising electricity costs and an aging grid, it's time for a reliable solution that gives ...

Customize our all-in-one system to suit your facility - with or without solar - and lower your energy bills from day one. Your system will include battery modules, bi-directional inverters, a thermal ...
