Learn how solar grazing with sheep is revolutionizing vegetation management at solar farms while preserving agricultural land.

In 2021, he and his family began contracting with solar farms -- sites with hundreds of thousands of solar modules -- to use his sheep to eat the grass. What was once a small business ...

At one time, the five-acre array was billed as the largest solar power plant in West Virginia, and now it also hosts sheep during the grazing season, from April to October.

Solar shepherds, who manage sheep grazing under solar panels, are part of a growing movement that combines agriculture and renewable energy -- and offers high incomes in the process.

The study, led by engineering and Ivey Business School professor Joshua Pearce, shows utilizing sheep on solar farms was not only lucrative for farmers but offered a promising path forward ...

Instead of plowing fields, Raines spent the year ferrying his flock of sheep to solar farms, to munch on the grass that grows around the gleaming panels. The deals he struck for this natural...

Sheep are becoming a key ally in solar power generation, according to the Associated Press. SB Energy is operating the fifth-largest solar power plant in America. It's using local sheep ...

The adoption of solar power in sheep herding emerges as a vital advancement in modern agriculture. By harnessing a renewable energy source, shepherds can effectively lower their ...
