This report provides an in-depth analysis of Austria's PV market and developments over the past year. 2023 was a landmark year for PV installations in Austria, with a total of 2.6 GW of new photovoltaic ...

Apr 2, 2012&#0183; Solar power in Austria contributes 8.82 TWh of generation to the Austrian grid, accounting for 11.2% of total electric power generation as of 2024, with 8.48 GW of installed capacity.

Solar PV accounted for 19% of Austria's total installed power generation capacity and 8% of total power generation in 2023.

Renewable energies are the economic engine of the future worldwide. Here you can find selected data on Austria's renewable energy sector.

In 2024, Austria achieved another year of record photovoltaic (PV) deployment, adding 2.51 GW of new capacity and bringing cumulative installations to 9.4 GW (DC). PV generation reached approximately ...

Historically, the average for Austria from 1980 to 2023 is 0.52 billion kilowatthours. The minimum value, 0 billion kilowatthours, was reached in 1980 while the maximum of 6.09 billion kilowatthours was ...

Depending on the electricity demand in 2030 and available demand-side flexibilities and storage capacity, the optimum for PV can vary. The potential in Austria is huge.

The huge expansion in renewable generation over the next few years will pose the next major challenge for Austria's electricity sector - the system will become more decentralised, with numerous small ...
