Iraq is finally proceeding with the country's first big solar power plant. The Baghdad government has stepped up the effort to adopt a more environmentally sustainable energy policy that ...

Al-Zawraa State Company has taken an important step toward strengthening Iraq's energy sector by signing a contract to build a new hybrid solar power plant. The move highlights a growing ...

A man walks near solar panels on his farm, an increasingly popular sustainable energy option for homes and farms to generate electricity, in Mosul, Iraq, July 8, 2025.

Solar projects operating under Iraq's weak grid, whether serving as backup power sources during outages or directly connecting to the grid, have the potential to affect the overall stability of the ...

With frequent grid shortages, a hot and dry climate, and high solar irradiance, Iraq presents a strong case for both small-scale solar electrification and utility-scale solar investment.

In the present study, researchers examined a solar off-grid-connected photovoltaic system for a family house in the city of Baghdad. The design was created with the help of the "How ...

In this article, we will explore the dynamics of Iraq's solar energy adoption, highlighting the motivations behind this transition and the potential for future growth.

Iraq is set to open its first industrial-scale solar plant in a vast desert area in Karbala as the government attempts to tackle an electricity crisis that has led to widespread blackouts.
