The S:FLEX PV fastening system is a frame system for mounting PV modules on industrial roofs consisting of trapezoidal and corrugated sheet metal, corrugated fibre cement and sandwich elements.

We supply engineered products built for clean, renewable solar power generation such as solar panel hardware, fasteners and more.

These bolts provide a reliable attachment method, allowing off-grid users to harness solar energy for power generation in remote locations where traditional utility connections are not available.

Using the right installation method and key components (e.g., solar hanger bolt, tile roof hook, adjustable Middle clamp kit) ensures long-term safety, durability, and optimal solar energy generation.

Solar fasteners are a crucial, yet often overlooked, component of solar panel installations. These specialized screws, bolts, and other hardware play a vital role in ensuring the ...

Would you like to tell us about a lower price? Solar roof mounting head hanger bolt Asphalt shingle roof or mounted directly onto the roofs Installation: Drilled into the truss.

Hanger bolts are essential components in rooftop solar installations. They provide a strong and reliable connection between solar mounting systems and roof structures, ensuring long ...

Made of high quality aluminium and stainless steel components ensures optimum strength and long life. Products are pre-assembled to reduce installation time and give a cost effective solution. Versatile ...
