China's National Development and Reform Commission (NDRC), in conjunction with the nation's energy administration, is taking steps to roll back subsidies for renewable energy projects, ...

China's top economic planning agency said on Sunday it was taking steps to scale back subsidies for renewable energy projects after a boom in solar and wind power installations.

China identified solar panels as a priority more than a decade ago, handing subsidies and low-cost financing to developers and manufacturers while pushing utilities to use more renewable...

BEIJING, 10 February 2025 - In a move to reshape the global renewable energy landscape, China announced that it will reduce subsidies for wind and solar projects after achieving its clean energy ...

Reduced solar subsidies could add pressure on China's solar industry, where overcapacity relative to global demand has led to a drop in module prices.

In fact, China met its 2030 clean energy goals six years ahead of schedule. These achievements were largely driven by generous subsidies and guaranteed pricing mechanisms that ...

In this article, we will delve into the implications of these changes on China's solar industry and explore how they reflect broader trends in global renewable energy investment.

China has increased its solar subsidies tenfold to \$137 million for 2024, focusing on rural power and R& D. Learn how this massive investment impacts the solar industry.
