Our product portfolio features tempered, ultra-clear solar glass solutions with anti-reflective coating that diminishes reflectivity and improves light transmission.

Let the light in with Mitrex Solar Glass -- a powerhouse in disguise, where photovoltaics meet limitless design, where color meets clarity. You're not just choosing glass; you're choosing a future where ...

The Solarvolt BIPV glass system replaces traditional facade cladding materials and enhances commercial building exteriors by providing sunshading, overhead glazing, CO2-free power ...

Crafted with heat-treated safety glass, our photovoltaic glass provides the same thermal and sound insulation as traditional options, flooding spaces with natural light. Perfect for facades, curtain walls, ...

Our passion is glass and we live this every day, for over 40 years. So we have invested a lot of time and money in research and development of modern special glasses for photovoltaic and solar thermal ...

The system uses a high-performance BIPV solar panel that doubles as exterior cladding. Unlike rooftop systems, it requires no additional mounting and integrates seamlessly with the architecture.

Single building installation can avoid 2.2 million miles of CO2 vehicle pollution; 12-times more than solar. When modeled for buildings, engineered to outperform rooftop solar by 50-fold: Apply to acres of ...

SunEwat is a laminated glass with embedded monocrystalline or polycrystalline photovoltaic cells - a component that actively produces electricity and thus significantly improves the energy balance of ...
