Swiss engineers are converting excess summer solar into hydrogen stored in repurposed natural gas caverns. Come winter, this becomes heating fuel - solving the seasonal mismatch that ...

A new pumped-storage power station, one of the most powerful in Europe, came on stream in canton Valais in southern Switzerland in July 2022.

We produce an innovative, cost-effective battery designed for extended energy storage, making it ideal for large-scale stationary storage solutions and seamless integration with renewable ...

Axpo is currently building one of Switzerland"s largest battery storage facilities in Gurtellen in the canton of Uri, with a capacity of 50 MW. The facility can store up to 100 MWh, ...

Trade body Swissolar has called for a national energy storage strategy to support the rising popularity of home solar-plus-battery systems in the country. In Switzerland, roughly every ...

In Switzerland, approximately half of all residential photovoltaic (PV) systems are now paired with battery energy storage systems (BESS), reflecting a growing trend toward energy self ...

In Kappel, in the canton of Solothurn, one of the largest battery storage systems in Switzerland is currently under construction, with a total capacity of 65 megawatt-hours. The successful delivery of ...

Explore the rapid growth of Switzerland"s home solar storage market. Learn about key drivers like federal incentives, rising demand, and future tech advancements.
