As of now, the title of the biggest wind turbine in the world belongs to the Vestas V236-15.0 MW, a groundbreaking offshore wind turbine developed by the Danish manufacturer Vestas.

As countries strive to reduce their carbon footprints, projects like this set the stage for future innovations in wind technology. The largest wind turbine currently operational is the...

Chinese manufacturer, Sany, holds the record for the world's most powerful onshore wind turbine. At 15MW, the turbine is rated twice the figure of other market-leading models. Sany also ...

A planned supersized floating wind turbine with two spinning heads will generate nearly double the amount of energy as the current record-holder

List of largest wind turbine models, based on rotor diameter and wind turbine sizes. Learn how different models of wind mills impact energy production.

The MySE 16-260 earns its largest-ever tag thanks to its rotor diameter of 260 meters (853 feet) and its swept area of 53,902 square meters (580,196 square feet); it's also the most ...

Explore the top 13 largest wind farms in the world by capacity, with key facts, stats, and global clean energy insights.

This is a list of the most powerful wind turbines. The list includes wind turbines with a power rating that is within 5 MW of the current most powerful wind turbine that has received customer orders that is at ...
