-----

Solar skeleton lights are durable, weather-resistant Halloween decorations that provide realistic flickering effects and reliable outdoor performance when built with quality materials like IP65-rated ...

Beautiful item in excellent condition as advertised at a really good price from an excellent ebayer. Looks like the real thing!

This spooky solar skeleton is going to dance their way into our heart and minds to teach us about being solar powered by light hitting a solar panel! ----- Thanks for watching and please...

Solar - Powered: Equipped with solar panels, this halloween skull decorations charges during the day under sunlight. When night comes, it lights up, casting an eerie glow from the skull eyes.

This Solar Skull Light is made with high-quality materials, featuring a realistic look and exquisite details. During the day, the solar panel automatically absorbs sunlight and stores energy. At night, it lights up automatically, emitting ...

Place a zip tie through your hole under the solar panel module and around the front of the collarbone and over top of the module between the button and the solar panel. See picture. Pull one pair of ...

Pictures do not do this justice. Skeleton's head will flutter/swing. Put this on your window sill or right by a window where it will get a lot of sun light to power it up and it works great.

#Finnabair #mixedmedia #halloweenToday I'm sharing this full tutorial, This was a fun little project to make. I hope you enjoy please subscribe and hit that ...
