When Typhoon Haiyan struck the Philippines in 2013, it destroyed 90% of solar installations in its path within 6 hours. This wake-up call revealed a critical gap in renewable energy infrastructure - our ...

Here's a plot twist you didn't see coming: During 2023's Typhoon Khanun in Okinawa, several homes lost roof tiles while their solar arrays stayed put. The reason? Modern mounting systems distribute ...

In October, solar panels were among the many infrastructure casualties of Hurricane Milton, for example. But suppliers have been working on solutions for years.

TAIPEI (Taiwan News) -- The Ministry of Economic Affairs said Wednesday that Typhoon Danas damaged approximately 145,000 solar panels in Chiayi and Tainan, with a total weight of ...

Typhoon Doksuri has blown away dozens of PV panels and jeopardised six gas pipelines leaving hundreds of thousands without power

Typhoon Doksuri has blown away dozens of PV panels and ...

When Typhoon Haiyan struck the Philippines with 315 km/hour winds, it didn't just level homes - it obliterated solar installations that could have provided critical power during recovery.

When faced with such fierce typhoons, PV modules may struggle to hold up. Typhoons create wind pressure on the module surface, which can lead to cracked glass, deformed frames, ...
