Despite wartime risks and constant pressure on the energy system, Ukraine continues to develop a new decentralized, resilient, and modern energy infrastructure. One such project is the construction of a ...

This triggered an increase in self-consumption PV and energy storage among Ukrainian businesses and homes, seeking energy security and greater resilience against the damaged grid.

Incorporating both technologies will help to stabilise Ukraine's grid during peak demand periods, reducing the frequency and duration of power outages and ensuring uninterrupted electricity ...

The project, developed by Energysave, features a 3.8 MW solar power plant coupled with a 6.9 MWh energy storage system. According to PV Magazine, the Ukrainian company has already ...

This comprehensive analysis delves into the core drivers, technical solutions, and strategic pathways for deploying resilient solar-plus-storage systems across Ukraine, providing a ...

DTEK Group, together with the U.S. company Fluence, a global leader in energy storage, commissioned 200 MW of capacity with a total storage volume of 400 MWh. The new facilities, ...

In 2023, KNESS became the first company in Ukraine to obtain a license to operate in the energy storage sector. To date, it has completed 1.3 GW of solar power plants in Ukraine, Poland, ...

This report explores the current policy landscape for distributed solar PV in Ukraine and outlines three potential policy options to accelerate the deployment of this technology.
