The construction will take place on Vatican property approximately 11 miles from Rome, in the area of Santa Maria di Galeria. The property is currently used for broadcasting Vatican Radio.

Italy has agreed to a Vatican plan to turn a 430-hectare (1,000-acre) plot of land north of Rome into a vast solar farm that will generate enough electricity to meet the needs of Vatican City.

To achieve the basilica's goals, Alberto emphasizes starting small. For example, the Vatican has introduced low-energy lighting systems; over 100,000 LED lights have replaced older fixtures, cutting ...

Pope Francis has announced measures to transition Vatican City to using solar energy as its main source of electricity, as outlined in his latest motu proprio titled Fratello Sole, or "Brother...

The agrivoltaic plant, to be installed on Holy See property in Santa Maria di Galeria, aims to provide Vatican City State with renewable electricity while preserving agricultural use of the land.

Built in 1969, the auditorium is one of the Vatican's more modern buildings and can seat around 6,300 people. The dark solar panels supplied by German company SolarWorld have replaced ...

It asks the Church, and the world, to imagine a future where the power that lights the Vatican's basilicas comes not from fossil fuels, but from the sun that shines on its fields.

Vatican foreign minister Archbishop Paul Gallagher signed the agreement with Italy's ambassador to the Holy See, Francesco Di Nitto. The Italian parliament must approve the arrangement since it has ...
