Japan is reimagining water infrastructure with tech, transparency, and collaboration to boost resilience amid ageing systems and climate challenges.

Water is becoming an increasingly high priority globally - here's how leaders are redefining investment in water systems to drive resilience and growth.

The structural design of Mate Solar's MTCB series products is more compact and flexible. It can help customers cut peaks and valleys, adjust peaks and frequency, reduce dependence on the power ...

Water is not only a victim of climate impacts but it is also a critical enabler for renewable energy, food security and industry. The 2026 UN Water Conference will be a pivotal implementation ...

Protecting the global water cycle can help us achieve many of the SDGs. Here's how public-partnerships can unlock innovative solutions for a sustainable future.

Figure 9 is the 3D drawing of the designed system in isometric view and side view with solar panel, glass cover, radiator, water storage tank, water pump, structural stand & piping.

These structures are highly customizable, allowing architects to design layouts, select sustainable materials, and integrate energy-efficient features, thereby reducing their ecological ...

How the Global Future Council on Energy Nexus is shaping integrated solutions to manage the energy, food and water nexus in a resource-constrained world.
