Discover our range of solar trough collectors, perfect for efficient solar power. Wholesale prices and high performance. Ideal for CSP plants and solar thermal projects.

The M-shaped water guide trough is a component used in building-integrated ...

The M-shaped water guide trough is a component used in building-integrated photovoltaic (BIPV) systems. It is designed to efficiently collect and channel rainwater away from the roof, preventing ...

The company has an excellent management team and a professional R & D and production team, and the main products include high cost-effective automatic tracking photovoltaic ...

In solar energy systems, photovoltaic waterproof panel troughs act like raincoats for your PV modules. Imagine a heavy storm - while solar panels withstand direct rain, the mounting system beneath ...

The metal structures offered by us are ideal for photovoltaic panels (solar panels), and because they are made of light steel profiles designed and manufactured with high precision, the assembly becomes ...

The solar waterproof structure mounting system provides a reliable solution for installing solar panels while protecting against water intrusion. Its durable design and ease of installation make it an ...

Nema Enclosures standard and custom powder coated carbon steel, 304 stainless steel, 316 stainless steel and 5052 aluminum wire trough electrical enclosures house and protect wires from water and ...
