This document provides estimated weights and dimensions of the 3 MW Platform wind turbines. The weights and dimensions herein do not include shipping frames/fixtures.

Our smart wind turbine series products are adapted to multiple usage scenarios with excellent wind power generation performance.

One-stop Full Life-cycle Solution for Instant Renovation Penetrating deep into wind resources, wind turbines, wind farms, and smart O& M,

PMDD Smart Wind Turbine Outstanding energy production at low wind speeds speed range for grid and high conversion low wind speeds

Smart transmission: Significantly improves data transmission efficiency and convenience for the new 3MW model, while supporting remote data collection and transmission. Smart control: Flexible power ...

Smart Control: Goldwind's big data analysis of 10,000+ installed direct-drive turbines and more than 20 years of wind energy expertise, have resulted in the most advanced algorithms

The wind turbine GW 150 / 3000 is a production of Xinjiang Goldwind Science & Technology Co., Ltd., a manufacturer from China. This manufacturer has been in business since 1982.

Through the scalable nature of the GW3S platform, the rated output of the turbine can be scaled from 3S MW to 3.57MW and features an increased rotor diameter size of up to 140 meters.
