What is the Wellington Battery energy storage system?

Project Summary The Wellington Battery Energy Storage System project consists of a grid-scale BESS with a total anticipated discharge capacity of 500MW and a storage capacity of 1,000MW hours. Fluence Energy had the contract to design, supply, construct and commission the installation.

Where is the Wellington Battery located?

The existing Wellington substation is very strategically located within the NSW energy grid. The output from both stages of the Wellington Battery represents the demand from over 60,000 homes. This fund has been established with Dubbo Regional Council (DRC), allocating \$2 million to the local community over the Battery's life.

How long will it take to build the Wellington Battery?

Plans for construction of Stage 2 are ongoing, but construction is likely to follow 12 to 18 months behind Stage 1. The existing Wellington substation is very strategically located within the NSW energy grid. The output from both stages of the Wellington Battery represents the demand from over 60,000 homes.

When will the Wellington substation be built?

Construction of Stage 1 (300MW / 2 hours) will start mid-2025, finishing early 2027. Plans for construction of Stage 2 are ongoing, but construction is likely to follow 12 to 18 months behind Stage 1. The existing Wellington substation is very strategically located within the NSW energy grid.

The Wellington Battery Energy Storage System project consists of a grid-scale BESS with a total anticipated discharge capacity of 500MW and a storage capacity of 1,000MW hours. ...

Ampyr, a major new player in the battery storage sector in Australia, says it has signed the first supplier and off take deals for its first big battery project in Australia, as it sets its sights on delivering more ...

The Wellington Stage 1 BESS is AMPYR's first grid-scale battery energy storage system to reach financial close in Australia. This project is scheduled to be energised in 2026, signaling a ...

That's exactly what the Wellington Outdoor Energy Storage Field concept aims to achieve. As global renewable energy capacity grows 8% annually (Grand View Research 2023), efficient storage ...

This piece is your backstage pass to understanding why industrial-scale battery systems are hotter than a Texas
