Are Chinese solar power inverters connected to critical infrastructure grids?

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters connected to critical infrastructure grids across the country.

Are Chinese solar power inverters Rogue?

However, rogue communication devices not listed in product documents have been found in some Chinese solar power inverters by U.S experts who strip down equipment hooked up to grids to check for security issues, the two people said.

Who makes the most solar inverters in the world?

Huawei is the world's largest supplier of inverters, accounting for 29% of shipments globally in 2022, followed by Chinese peers Sungrow and Ginlong Solis, according to consultancy Wood Mackenzie. German solar developer 1Komma5 said, however, that it avoids Huawei inverters, because of the brand's associations with security risks.

Who makes Chinese inverters?

Chinese inverters from top manufacturers have taken over the world's markets; Huawei, Sungrow, and Ginlong Solis are among them. Huawei accounted for 29% of the inverters that were sold in the world in 2022. While it left the U.S. market in 2019, its equipment is used in many places.

The communication distribution box, Communication Cabinet, from SMA Solar Technology serves as cabling for all communication components that are used in large-scale PV systems with Sunny ...

According to energy consultancy Wood Mackenzie, Chinese companies Huawei and Sungrow controlled more than 50 percent of the global solar inverter market in 2023. While neither ...

Some utilities, including Florida's largest power supplier, Florida Power & Light Company, are attempting to minimize the use of Chinese inverters by sourcing equipment from ...

The two people declined to name the Chinese manufacturers of the inverters and batteries with extra communication devices, nor say how many they had found in total. The existence ...
