How many 5G base stations will China have in 2025?

China plans to have 26 5G base stations for every 10,000 people by the end of 2025, as the nation works hard to build a new digital infrastructure that is intelligent, green, safe and reliable, according to a five-year plan unveiled by the Ministry of Industry and Information Technology on Tuesday.

How does 5G work?

5G networks divide coverage areas into smaller zones called cells, enabling devices to connect to local base stations via radio. Each station connects to the broader telephone network and the Internet through high-speed optical fiber or wireless backhaul.

Located at Nanqiao East Huancheng Road and Hangnan Highway in the city's Fengxian District, the station is located on the main branch of Line 5 and opened as part of the southern extension of Line ...
