The Solar Program is executing the Solar America Initiative by working with industry, national laboratories, universities, and other members of the solar energy community.

The department responsible for solar energy varies by country and is often influenced by governmental organization, policy frameworks, and energy market structures.

The first section details a brief history of solar power in the United States, followed by an overview of how solar power is generated, which entities use it, and the technology involved in supplying solar ...

The Department of Energy also funds scientific research in the field. It is the parent agency for the Energy Information Agency, and the Office of Energy Efficiency and Renewable Energy.

The U.S. Department of Energy's Office of Energy Efficiency and Renewable Energy (EERE) has three core divisions: Renewable Energy, Sustainable Transportation and Fuels, and Buildings and Industry.

Solar photovoltaic systems Solar photovoltaic (PV) devices, or solar cells, convert sunlight directly into electricity. Small PV cells can power calculators, watches, and other small electronic ...

The Energy Department promotes solar energy through comprehensive policy formulation aimed at advancing renewable technologies. This governmental body is responsible for establishing ...

Solar RECs (SRECs) are created for each megawatt-hour of electricity generated from solar energy systems. The ultimate owner of the SREC owns the "solar-ness" of the power.
