How much does a solar panel shipment weigh?

The exact weight and dimensions of a solar panel shipment varies widely across different models. Assuming a weight of around 50 lbs per commercial solar panel and a pallet that fits about 30 panels, a single pallet of solar panels could weigh upwards of 1500 lbs.

Can solar panels fit in a truckload?

And while residential solar panels typically fit into a conventional truckload, utility-scale solar panels could qualify as oversized shipments depending on the dimensions. Heavy-haul and oversized loads require additional permits, optimized routing, and even specialized equipment like flatbed trailers.

How do I ship solar panels overseas?

Ocean freight is typically the most cost-effective way to ship solar products overseas, while air freight is usually a faster option for projects with strict deadlines. Once a solar panel shipment arrives at the destination country, it can be moved inland through a variety of intermodal transport methods.
