How much does it cost to install solar panels?

The average cost to install solar panels is \$12,600 to \$37,800 for a 6 kW to 12 kW system, after subtracting the 30% federal tax credit. Residential solar panels cost \$3.00 to \$4.50 per watt, including installation. However, the cost of solar panels continues to decrease each year as solar energy becomes more popular.

Why should you hire a qualified solar panel installation company?

Hiring a qualified solar panel installation company can help you harness the power of the sun and save on utility bills. Local solar panel installation professionals will hold the certifications necessary to install your solar panel system properly.

How does a professional install a solar panel system?

A qualified professional will attach the solar panel racking on the roof or the ground mounts (if the panels are at ground level) to install a solar panel system. They will install the solar inverters and secure the panels into the racking or mount. Solar panel pros will also install a battery if it's part of the solar panel system.

Does getting less sun increase the cost of solar panels?

While getting less sun at various times in the year does not increase the cost of owning solar panels, it can affect how much you save. More advanced and durable solar panels, batteries, and inverters may cost more upfront, but typically last longer and perform better than cheaper options.

How much does it cost to install solar panels? The average cost to install solar panels is \$12,600 to \$37,800 for a 6 kW to 12 kW system, after subtracting the 30% federal tax credit. Residential solar ...
