Now as some of you may know I made a wind generator before and got a lot of good feedback. Now in the old one I left it up to you to decide what you wanted to do with the energy it put out.

Up to 6% cash back! Standing at 35 in. height and 18.1 ...

Standing at 35 in. height and 18.1 in. Dia. this beautiful decorative wind turbine harnesses the power of the wind to light up your outdoor space. Perfect for enhancing your garden or patio, it ...

Make an LED light up with the power of the wind! We'll connect an LED to our fan ("Wind Generator") and make the LED turn on using electricity generated from air making the motor spin.

You've just built your own wind-powered LED system, using wind to generate electricity. Experiment with different blade shapes and sizes to see how they affect the power output!

By attaching blades to the motor, wind can be used to provide mechanical energy to the motor so that it works like a generator and supplies electricity. This electrical output could be measured with a ...

As a wind vane, it can rotate freely to show the direction of the wind. Delicate and beautiful led night light strip atmosphere, ideal for garden decoration. It can be slightly rotated even ...

In this video, Dr. Garcia demonstrates a simple Wind Turbine Generator assembly that generates electricity to light single and double LED lights. The wind catchers are used to turn wind ...
