But over the last few years, the industry has taken hit after hit, with everything from broken contracts and canceled wind farms to rising inflationary costs and supply chain issues.

Each month or quarter, a new record is broken and dozens of new carbon-free power projects are brought online. But many writers and pundits group wind and solar together.

On September 22, a U.S. judge ruled that [#216](#);rsted could, for now, restart construction. With new federal permits for wind projects being frozen, it is no secret that the political wind isn't...

Despite the installation of more and more wind turbines, wind production declined in July to a 33-month low. Wind production also declined in 2023 from the year before despite 7 gigawatts of ...

The culprit? A single damaged turbine blade that broke off at a nearby wind farm. It's not the first time this has happened, and it won't be the last.

America's first large-scale offshore wind farms began sending power to the Northeast in early 2024, but a wave of wind farm project cancellations and rising costs have left many people with ...

July 24 (Reuters) - The amount of electricity produced by wind farms in the U.S. fell to a 33-month low on Monday, forcing power generators to crank up natural-gas fired plants to keep air...

Wind Energy Wind power or wind energy is a form of renewable energy that harnesses the power of the wind to generate electricity. It involves using wind turbines to convert the turning ...
