Wind and solar investments in the first half of 2025 fell 18%, to nearly US\$35 billion (prior to the enactment of this act), compared to the same period in 2024. 1 Still, renewables dominated US ...

Latest news on energy storage projects, BESS, capacity expansion, and regulatory updates across Europe, US & Canada, Latin America, and Asia Pacific. Discover how energy storage ...

Dozens of large-scale solar, wind, and storage projects will come online worldwide in 2025, representing several gigawatts of new capacity. The Oasis de Atacama in Chile will be the ...

What We Do We are a market-leading, independent power producer and service provider, delivering: wind (onshore and offshore), solar photovoltaic, storage, and electrical vehicle charging. View our ...

A new, floating pumped hydropower system aims to cut the cost of utility-scale energy storage for wind and solar farms.

The map features AES" projects currently under construction and in operation as of November 4, 2025. For more detailed information, please refer to our Investor Fact Sheet.

This study investigates the techno economic benefits of integrating Battery Energy Storage Systems (BESS) into wind power plants by developing and evaluating optimized hybrid operation...

Developing, constructing, and operating grid scale wind, solar and storage solutions.
