-----

The global wind turbine blade market was valued USD 95.3 billion in 2024 and is estimated to grow at a CAGR of 6.6% from 2025 to 2034. Wind turbine blades are large, aerodynamic components that ...

Key drivers include the declining cost of wind energy, technological advancements leading to larger and more efficient blades, and the growing focus on decarbonization efforts across ...

Blade manufacturing plants expanded to 65 sites worldwide in 2023, up from 52 in 2020, with 30 sites dedicated to offshore blades and 35 to onshore blades. The market's total installed ...

Over the forecast period of 2024-2030, the market is anticipated to grow at a CAGR of 13.4%. The wind turbine blade market is a rapidly growing and dynamic industry that is playing a critical role in the ...

The global wind turbine blade market is estimated to be valued at USD 29.34 Bn in 2025 and is expected to reach USD 45.68 Bn by 2032, exhibiting a compound annual growth rate (CAGR) ...

Innovations in aerodynamics and lightweight materials are creating new opportunities in the wind turbine blades market. The introduction of segmented blades allows for easier ...

The Wind Power Blade Market Research Report delivers a sharp, evidence-based assessment of market size, growth trajectories, and emerging shifts that will impact your strategic ...

Glass fiber will dominate with a 62.4% market share, while onshore will lead the application segment with a 58.7% share. The wind turbine blade market is set to increase from USD ...
