Its core products are crystalline silicon modules, including monocrystalline (such as PANDA-type) and multicrystalline (YGE-type) panels for residential, commercial, and utility-scale projects.

The PV module of Yingli Solar silently begins its daily energy harvesting as the first light of dawn appears on the planet. These deep blue PV panels convert the sun's abundance into clean electricity...

At a significant industry forum held recently, Yingli Solar gathered with representatives from various sectors to discuss the future development path of the photovoltaic (PV) industry.

Local governments and enterprises commenced a green transition, with solar energy at the forefront of the development, which included solar energy stations and equipping buildings with solar panels.

The investigation named three Chinese companies -- Yingli Energy Company Limited, Jiangsu Highhope International Group Corporation and Yangzhou Jinghua New Energy Technology ...

China is facing a recycling challenge and environmental strain caused by large numbers of end-of-life solar panels after a decade of rapid photovoltaic (PV) industry expansion.

Yingli Energy has announced that the launch of China's first demonstration line for the recycling and processing of modules will see its new production capacity in Tianjin, Lixian and ...

On April 26, Yingli Energy (China) Co., Ltd. and Sun City to Import Renewable Solar Energy Systems signed a strategic cooperation agreement to jointly develop the regional renewable energy market.
